

5G TACTIC

5G Trusted And seCure network servICes

- 5G-TACTIC is a Digital Europe Project and its activities include development of a 5G Cybersecurity toolbox, security analysis, evaluation, testing and mitigation measures for 5G.
- Technical activities involve piloting, integration and evaluation of multivendor open 5G solutions considering security aspects.
- The consortium brings together regulators and security agencies from 4 EU member states collaborating with high technology SMEs, mobile network operators, infrastructure providers and academia.
